Shenzhen GERMID Co., Ltd.

OUR MISSION

GERMID is committed to standards of excellence and innovation. With God and integrity as our foundation, we serve drivers all over the world and provide them with safe and practical rearview mirrors.

ABOUT THIS CATALOGUE

The contents of this catalogue are mainly some products of our company targeted at the aftermarket. We also develop customized rearview mirrors for some automobile factories and various special industries. These rearview mirrors have some special functions and fully meet the safety requirements of laws and regulations. Due to NDA(Non-disclosure Agreement) was signed with various customers, it can not be disclosed to the public. If you have the rearview mirror customization requirements, we will be your best choice.

COMPANY HONOR

Certified by TS-16949 multimedia rearview mirror
 Certified by the U.S. Department of Transportation .
 Certified compulsorily by safety standards of EU
 Strategic partner of Donnelly Corp. for global patent.
 Compulsory certification unit of China 3C.
 Certified by TUV Rheinland LAB for products.
 Certified by Ford accessory system.
 Certified by Mazda accessory system.
 Certified by Chevrolet accessory system.
 Certified by Nissan accessory system.
 Certified by Isuzu accessory system.

WHAT IS A SAFE REARVIEW MIRROR

Quality

To produce a high-quality car rear view mirror, the supplier needs to have a perfect system of design and manufacture. Germid passed the TS-16949 regulation system, and the concept of security runs through the whole design and manufacturing process. All products passed various tests, such as temperature aging test, mechanical resistance test, electronic performance test, chemical resistance test, weather resistance test, and EMC EMI test.

Safety

The rear view mirror is a safety part and compulsorily certified by every country. It must conform to the related safety standards, while it is ignored by many sellers. They pay much attention to the electronic functions, such as the GPS & navigation, bluetooth etc, thus ignoring that the rear view mirror itself should be a perfect mirror, a mirror that the driver can view the back from it.

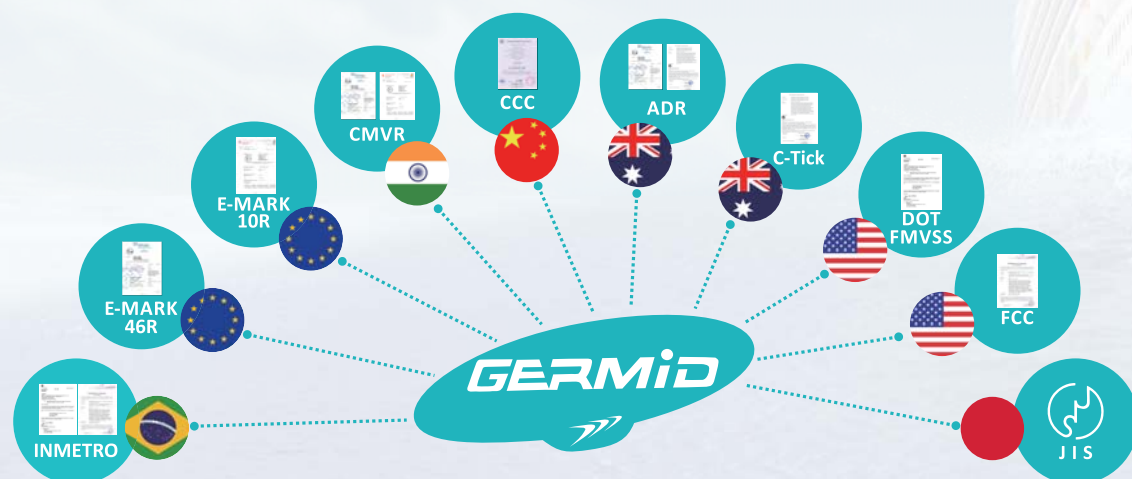

At the same time, Germid complies with the safety standards set by the automotive security department of related states, which makes customers get the rearview mirror that conforms to the safety regulations.

Patent

Some U.S companies stepped into the development of electronic rear view mirror earlier, so many patents of rear view mirror are owned by them. Now more than 97% OEM rear view mirrors are occupied by two U.S companies. Those in Asia and Europe are confident to this area even though they know little. However, they choose to leave after further study of car rear view mirror since they're restricted in many patents.

Some suppliers sold some mirrors that are not certified because of their limited industry knowledge, causing some hidden risks in the future business.

Germid has a extended knowledge of the patent for car rear view mirror, avoiding many patent restricts. We attach great importance to the innovation of science and technology by absorbing lots of patent technologies, occupying 9% share of global RCD rear view mirror.

Fully comply with the worldwide safety standards
Excellent Tier 1 supplier of car rear view mirror for vehicle manufacturers

FULL DISPLAY CAR REAR VIEW MIRROR MONITOR

YK-082

8.2" Full Display Car Rear View Mirror Monitor

- 8.2" monitor Ultra high brightness screen
- Resolution: 1280*256
- Automatic brightness adjustment
- 2 analog video inputs
- Signal format: PAL/NTSC
- Adjustable guide line
- Working Voltage: DC 10V to 16V
- Rear through view system (option)
- Projection android and ios phone images (option)
- Manual-dimming (option)

SK-073

FK-073

TK-073

7.2" Full Display Car Rear View Mirror Monitor

- 7.2" monitor Ultra high brightness screen
- Resolution: 1280*370
- Automatic brightness adjustment
- 4 analog video inputs
- Signal format: PAL/NTSC
- Trigger lines for rear/left/front
- Touch screen button
- Adjustable guide line
- Working Voltage: DC 10V to 16V
- Rear through view system (option)
- Projection android and ios phone images (option)
- Split screen (option)

YK-092-RA

9.2" 1080P Full Screen Streaming Media

- Full Screen
- Front & Rear Recording
- Soft Screen Display
- One Touch Button
- Front 1080P Recording
- Back up Camera Display
- Super Night Vision
- Water-proof Rear Camera
- Parking Monitoring
- G-sensor
- Dual Core Processor
- Loop Recording
- Car-level Streaming Media Rear View Mirror
- Sextuple Visual Filed

YK-092-NA

9.2" Android Navigation Full Screen Streaming Media

- Android 8.1 system
- Full Screen
- Navigation
- Front 1080P Recording
- Bluetooth handsfree
- Wi-Fi
- Voice Control
- Front & Rear Recording
- Water-proof Rear Camera
- Parking Monitoring
- G-sensor
- Loop Recording
- FM Transmission
- Car-level Streaming Media Rear View Mirror

PROJECTION MOBILE PHONE

Only connecting the IOS or Android phone's USB cable to the mirror component cigarette lighter can transfer the phone's audio and video to our mirror screen without setting WIFI tediously.

Due to many people have deserted the original car navigation, but to adopt phone navigation, the phone sticking on the dashboard is unaesthetic, easy to loose and fall down as well, which will disturb driving and cause danger.

Our mirror projects the phone navigation on the mirror screen, making it safer to use phone navigation in car.

SK-073A-MLK

FK-073A-MLK

7.2" Full Display Car Rear View Mirror Monitor with Projection Mobile Phone

- 7.2 inch LCD display screen
- Resolution: 1280*400
- 2-way video inputs
- Back up camera display
- Adjustable guide line
- Automatic brightness adjustment
- Touch screen button
- OEM replaceable bracket
- Signal format: PAL/NTSC
- Split screen (option)
- Projection android and iOS phone images (option)
- Bluetooth handsfree (option)
- Compass (option)
- 1 HD video input for through view (option)

SK-043A-MLK

AK2-043A-MLK

4.3" Car Rear View Mirror Monitor with Projection Mobile Phone

- 4.3 inch LCD display screen
- 2-way video inputs
- Back up camera display
- Automatic brightness adjustment
- OEM replaceable bracket
- Projection android and iOS phone images (option)
- Bluetooth handsfree (option)
- Compass (option)

AMBARELLA A12 REAR VIEW MIRROR MONITOR WITH BUILT-IN DASH CAM DVR

This full HD DVR mirror monitor adopts Ambarella A12 solution with HD recording, integrating car rear view mirror and DVR recorder perfectly. The professional processing technology of wide dynamic makes the abundant details available by capturing images in different lengths, and uniting two frames into one at the same time.

The 140°super wide angle makes the recording angle wider. With super night vision, more details will be visible in the video even in the poor light.

EV3-043LA-B12

- 4.3 inch ultra-high brightness screen
- Automatic brightness adjustment
- Backup camera display
- CPU: Ambarella A12
- Front recording 1080P
- Wide angle 140°
- Auto dimming (optional)

- Automatic record
- Parking mode for 12 hours
- G-Sensor
- Auto screen off
- Motion detection
- Dual ways recording (optional)
- Adjustable guide line (optional)

THE COMPARISION TABLE OF GERMID AMBARELLA A12 DASH CAM DVR AND SIMILAR PRODUCTS

| Project | Ambarella A12 of Germid | Related A12 products of other brands | Low-cost products |
|------------------------------|---|--|---|
| Electromagnetic Interference | Does not interfere the signal of GPS, Radio, phone or remote control key | (Unknown) | Result in reducing a level of the phone signal. Car's GPS/ RADIO/ Remote Control Key will be interfered to a certain extent. |
| Night Vision | Pursure better Night Vision | Pursure higher configuration but with a ordinary quality of Night Vision | (Unknown) |
| Material | Adopt the car-regulation anti-jamming power supply system, the cost is twice of similar products. | (Unknown) | Big radiation of the Partial power, poor stability. |
| Wide Dynamic | 1080P HDR with high resolution HDR is an extremely useful feature that can provide 60fps with the odd frames at a short exposure time and the even frames at a longer exposure time, then reproduce a greater dynamic range and luminosity in the captured video sequence. | If pursuit of more than 1080P solution, will lose the most valuable wide dynamic capabilities, then night vision and suppression of strong lighttability are poor. | By comparison, will find that night vision and suppression of strong light ability are very poor. |
| Stability | The system works under a very stable state | Pursure higher solution but overlook the damage from CPU's heat and unstability | Unstability |
| Save the final video | Video preservation of saving final video, we use Super capacitor instead of lithium battery. After ACC get cut off, the device still can recording for 2-5s, which is exactly what we need. | Adopt the car battery to save the last video, can not save 2 to 4 seconds before the power off the video. | DVR with lithium battery, there will be a hidden risk of explosion,which after battery is expired, battery may become a threat to life. And after power off, the final video may lost part of video, at least 30s or 3mins' s video may not be saved. |
| Product Positioning | Factory, image photography in-depth photography enthusiasts, science and engineering professionals. | Ordinary purchaser | The pursuit of economic benefits |

BLACK BOX HIDDEN DVR WITH WI-FI

Wonderful things are always too fleeting to be captured. Using our car Black Box system that has the same CPU brand and technology which is used by GoPro, and enjoy a wonderful journey!

- Parking mode recording.
- Forced memory function after abnormal power fails to try to store the last video when accidents happen.
- As a Black box, it can not be easily detected. This product can be hidden inside the rear view mirror or the mirror holder plastic case.

HD-12 Series

- CPU: Ambarella A12
- Parking mode recording
- G-sensor
- Undamaged installation
- 1080P car DVR recording
- Support WiFi connection
- Support wireless video transmission

HD-58 Series

- CPU: Novatek 96658
- G-sensor
- Undamaged installation
- 1080P car DVR recording
- Support WiFi connection
- Support wireless video transmission
- Dual-way recording (option)

WIN CE NAVIGATION REAR VIEW MIRROR MONITOR

OEM styled replacement rear view mirror with GPS navigation. This mirror monitor bundles a whole range of features into one unit. It acts as a rear view mirror, displays the backup camera, comes with complete GPS Navigation (from IGO) and has full Bluetooth capabilities. This monitor will direct you to your destination with the safety of a backup camera and the ease of hands free Bluetooth.

 This rearview mirror comes with licensed IGO map.

JM-043LA

- 4.3 inch ultra-high brightness screen
- Touch screen button
- Backup camera display
- Navigation
- Handsfree
- Automatic brightness adjustment
- Adjustable guide line
- Two video inputs
- WinCE System
- OEM replaceable bracket

REAR CAMERA DISPLAY MIRROR MONITOR SPECIAL FOR ONSTAR

For GM's Chevrolet, the car rear view mirrors are with some special emergency call buttons. If you choose another new mirror to replace the original one, such special emergency call function would not be available.

HK-043LA-Onstar

- 4.3 inch LCD display screen
- 2-way video inputs
- Back up camera display
- Automatic brightness adjustment
- 4.0 mm glass
- Car factory OEM bracket
- Adjustable guide line
- Onstar

BUILT-IN 2.4G WIRELESS RECEIVER 4.3" CAR REVIEW MIRROR AND CAR MONITOR

Model: **AWI** (OEM Replacement Bracket)
Model: **BWI** (Universal Clip on Model, easy Installation)

- 2.4G wireless digital, reliable signal transmission
- 4.3" high brightness car monitor with auto brightness adjustment
- High Brightness 1000cd/m2
- Free from the interference of WIFI, Bluetooth, etc..
- Transmission Range: >=100m.
- Image Quality:30f/s max,480*272(ov)
- Extremely short video delay:120ms Max.
- Automatically turn on once reverse gear is engaged.

WL-043

- 2.4G wireless digital, reliable signal transmission
- 4.3" high brightness car monitor
- Free from the interference of WIFI, Bluetooth, etc..
- Transmission Range: >=100m.
- Image Quality:30f/s max,480*272(ov)
- Extremely short video delay:120ms Max.
- Automatically turn on once reverse gear is engaged.

REAR CAMERA DISPLAY MIRROR MONITOR

Rear view mirror monitor with backup camera display, auto-dimming, manual dimming, compass, temperature, bluetooth, parking sensor etc. When you engage the reverse gear, the rear view monitor will automatically display the reverse camera.

GERMID auto dimming mirrors automatically detect and eliminate dangerous rearview mirror glare, making nighttime driving safer for drivers.

UNIVERSAL FEATURES

- 4.3 /7.2 inch LCD display screen
- 2-way video inputs
- Back up camera display
- Automatic brightness adjustment
- 4.0 mm glass and car factory OEM bracket
- Adjustable guide line
