Setting instruction:

FAQ

1.Q: What need to be paid attention to during installation?

- A: 1) Make sure that the carplay box is compatible with the installed model, and check whether the label of box matches with the car model
- 2) Power off during installation
- 3) After the installation is complete, it is best to lock the car for a few minutes to turn it on, wait until the running test is normal, then restore the car

2.Q: While switching to carplay, the screen displays no signal, yellow screen, abnormal screen or no response?

- A: 1) Check whether the wiring is connected according to the wiring diagram
- 2) If the wiring connection is normal but the display is not normal, check if the pins of the lvds cable ports are bent or not in contact, you need to re-plug it
- 3) Check whether the dip switch code is correct, after each change, re-plug the box's can power cable
- 4) If the dip switch code and wiring connection are normal after inspection, box still switches to the black screen, contact with the saler for a solution

3.Q: I don't have sound when I connect carplay, what can I do?

- A 1) if your car has AUX function, set on OEM system
- 2) No AUX on your car, you need to buy AMI-to-AUX cable to get sound

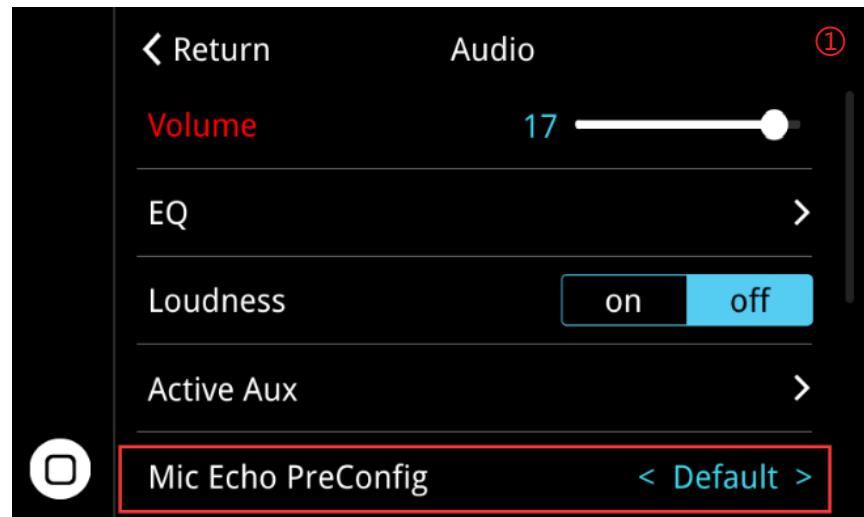

AMI

4.Q:When I call someone, he can hear himself, how to do?

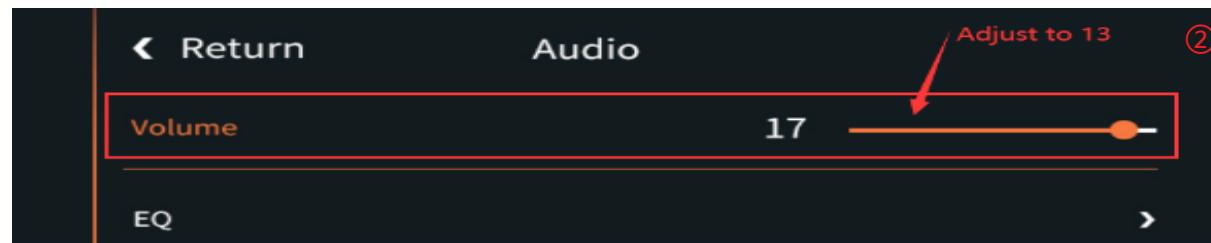

A:solution1

- 1)There are 4 default options available(Fig.1)
- 2) Try one by one, after changing the setting, restart to take effect

A:solution2

- 1) Adjust the volume of the original car to normal use
- 2) Turn the volume in 'audio' setting to 13(Fig.2)

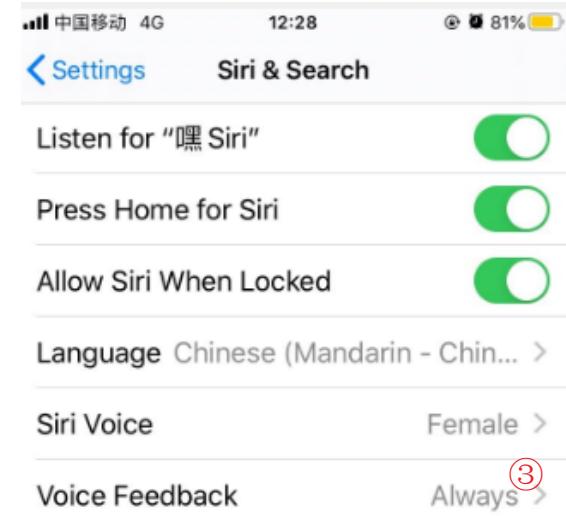

- 3) Turn the 'Microphone Volume' to 12
- 4) 'Microphone OP' tune from 0 until no echo is heard
- 5) Adjust 'AEC quality' to 2
- 6) If the caller hears the echo interval for a long time, fine-tune the 'Microphone delay'
- 7) If the caller hears a small voice, you can fine-tune the 'Microphone Volume' and 'Microphone PGA'

5.Q: Solutions to not being able to connect with carplay?

A: can try to use the solutions below separately or together

- 1) Click on carplay bluetooth or wifi on the mobile phone
- 2) At the same time, clear the Bluetooth devices on the mobile phone and the car, and then pair and connect
- 3) Go to WirelessDev to reset the Bluetooth, and then pair and (Fig.1)

- 4) Restore the mobile network to the mobile phone
- 5) Check whether the carplay on the mobile phone is turned on (Fig.2)
- 6) Siri permissions are all turned on(Fig.3)
- 7) If necessary, check the antenna (whether it is broken, or attached to the metal, stay away from the box)

6.Q:can I connect wireless Android auto with my huawei mate 20?

A:The following phone models support wireless Android auto

Phone Make and Model	Android Version
Pixel 3 or Pixel 3 XL	Android 8.0 or higher
Pixel 4 or Pixel 4 XL	Android 10.0 or higher
Samsung Galaxy S8 or S8+	Android 9.0 or higher
Samsung Galaxy S9 or S9+	Android 9.0 or higher
Samsung Galaxy S10 or S10+	Android 9.0 or higher
Samsung Note 8, Note 9 and Note 10	Android 9.0 or higher
Other Samsung models	Android 10.0 or higher

7.Q:I install the carplay, but the button on steering wheel can't work?

A:1)Set the setting 'Enable wheel key' to ON(Fig.1)
2) Short press the voice button or long press 5s the ok button on idrive knob to activate siri

8.Q:Siri function can not be used

A: 1) Check whether has turned the siri access permissions on iphone,turn all the options on
2) Turn the function of steering wheel on in carplay switch page setup
3) If can activate the Siri but Siri cant receive the command, please check whether the mic works first, if no problem with mic, check the Bluetooth of iphone, disconnect it from original car bluetooth
